DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: The claims are directed to a multitude of specific combinations of recited and disclosed a). infectious agent being targeted, b). nucleic acids being delivered, and c). cells being transduced and transplanted, which would impose a severe search burden on the Office. The infectious agents encompass any virus, bacteria, and parasites such as taught in page 4 of the specification; the nucleic acids encode a polypeptide comprising at least any portion of a receptor or a fusion protein containing a peptide from the infectious agent such as recited in claims 47 and 51; and the types of cells encompass any cell in a mammalian subject.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic; i.e. no single claim recites a specific combination of first and second agents.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. Applicant must elect a specific combination of a pathogen (e.g. an HIV virus), a polypeptide or fusion protein (e.g. a Mo-MLV gag-E. coli Rnase H fusion polypeptide), and a specific cell type (e.g. a liver cell); and indicate which of the claims readable on the elected species. An argument

that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Q. Janice Li whose telephone number is 703-308-7942. The examiner can normally be reached on 8:30 am - 5 p.m., Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah J. Reynolds can be reached on 703-305-4051. The fax numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9307 for After Final communications.

Any inquiry of formal matters can be directed to the patent analyst, Dianiece Jacobs, whose telephone number is (703) 305-3388.
